

# Find Your Flow.

## Forensics

Sandline provides defensible, efficient, minimally disruptive forensic services with a global team and New York City lab. We offer secure onsite, remote and in lab data collections, including targeted mobile device collections. Sandline's full suite of forensic investigation services include: departed employee protocols, data analysis, data remediation and expert reports. Our collection workflows seamlessly integrate with ECA and review workflows, helping reduce costs.

## Forensic Investigations

Our forensic analysis services come in three tiers: Coarse, Medium, and Fine, each including specific reports and expert deliverables. Coarse and Medium are fixed-price, while Fine is hourly. We also offer expert services for deposition support, ESI protocols, and testimony, billed hourly based on expertise.

## eDiscovery & Litigation Support

Sandline offers end-to-end eDiscovery solutions for any case size. From collection to production, our experienced team provides high-touch service, advanced analytics, and custom development, ensuring efficient and accurate results tailored to your needs. Trust Sandline for streamlined, defensible solutions. We own the successful outcome of every project.

## Modern Data and Translation

With an experience development team, Sandline builds add-ons for the easy review of mobile chat data and modern data.

Sandline's machine translation tool is built on the private versions of Google and AWS, integrating with both Relativity and Everlaw.

## Analytics & Generative AI

We optimize eDiscovery workflows with advanced AI, streamlining document review for efficiency and cost reduction. We encourage the use of analytics on every project and have years of experience developing and implementing TAR/CAL protocols. Sandline is at the forefront of Generative AI. With a focus on responsible Gen AI deployment, we provide tailored workflows and recommendations for successful outcomes.

## Managed Document Review

At Sandline, we hire expert managing attorneys with 10+ years' experience overseeing complex document reviews. Sandline attracts top reviewers and team leads, staffing the best and brightest people on your reviews, ensuring high quality work product. Our daily reports provide valuable insights, reviewer performance, budget tracking, and more. With thorough QC/QA processes, we ensure relevancy and privilege are expertly identified, reviewed, and categorized.

## **Managed Services**

Sandline Managed Services delivers customer-centric eDiscovery solutions, offering flexible pricing models and expertise in leading platforms like Relativity and Everlaw. With global support and a focus on achieving your business goals, we provide scalable, high-touch service to streamline processes and reduce costs. Sandline's agile enterprise services offer an adaptive, fully flexible, and bespoke eDiscovery ecosystem to suit each client's needs.

## **Fraud and Investigations**

We've partnered with KonaAI to offer a state-of-the-art solution that provides comprehensive investigations support for structured and unstructured data. Leveraging KonaAI's advanced machine learning technology, our platform transforms the way you process and review structured data. In addition to detecting patterns, our solution delivers real-time, actionable insights crucial for informed decision-making. By integrating KonaAI's unique structured data capabilities with our eDiscovery expertise, we provide a holistic investigations strategy.

## **Cyber Breach Review**

Sandline is your strategic cyber breach partner, providing comprehensive data breach review services. Our specialized teams conduct thorough reviews to ensure precise identification of affected personal information, a critical step in the breach notification process. Our comprehensive understanding of global privacy standards informs our meticulous approach.

## **Document Management**

Sandline specializes in secure digitalization for law firms, leveraging 20 years of Legal IT experience. As partners of iManage and Litera, we offer implementation, migration, training, consulting, and custom development services globally. Our custom tools enhance iManage integration and document management efficiency for clients.

# Why Sandline?

## **We have a culture of accountability**

We take ownership in the success of every project, flagging issues or even pushing back and responding quickly so problems are identified and addressed early on.

## **We are tenacious problem solvers**

We consider all potential solutions based on your goal—including custom ones—make recommendations and lay out an optimal path.

## **We have industry-respected experts**

Our team is respected across the industry for our expertise and experience because we hire industry-leading senior talent and retain them.

**We obsess over quality, so you don't have to.**

**Sandline is an independent, founder-led company committed to constant improvement backed by sky high standards.**
